ABSTRACT

This document describes the legislative history, development, and current status of the University of Kentucky Community College System. Legislated in 1962, the 13-college system enrolled 17,196 credit students in 1976 compared to 1,907 in 1967. Transfer students accounted for 37.4% of enrollment, Applied Science degree students accounted for 53.4%, and 9.2% had no degree objective. Fifty-four percent of the transfer students and 59% of the Applied Science degree students attended full-time. The total capital outlay for the system in 1975-76 was $12,517,033, with an average per student cost of $941.91. Entering students in 1976 averaged a mean composite ACT score of 15.7. Of all 1976 students, 26% report family incomes below $9,000, 80.6% are Caucasian, 35.3% are under 20 years of age and 34.8% are 26 or older. Data are presented longitudinally where appropriate: (1) by sex, college, degree level, and program; (2) on numbers of graduates, faculty degree levels, types and numbers of library materials, and in-service training activities; (3) on operating expenditures by college, services, function, general educational costs, and salaries; and (4) on ACT scores by sex and year, on ethnic enrollment, family income, and age distributions. DEVELOPMENT OF THE COMMUNITY COLLEGE SYSTEM

In 1962 the General Assembly of Kentucky, through the leadership of Governor Bert T. Combs, enacted legislation mandating the formation of a system of community colleges and entrusted the Board of Trustees of the University of Kentucky with the operation of such a system. At the same time, the legislature recommended five sites for future colleges.

The two factors responsible for the operation of the system being given to the University of Kentucky Board of Trustees were first, the recognition that as the governing board of the state's land grant university, the University of Kentucky Board of Trustees already had responsibility for the planning and operation of state-wide programs and secondly, recognition of the existence of the five extension centers then being operated by the University of Kentucky. Between 1948 and 1962, the University of Kentucky had opened four extension centers at Covington, Cumberland, Fort Knox, and Henderson, and assumed the responsibility of the municipally run Ashland Junior College.

In creating a system of community colleges, the 1962 General Assembly abandoned the extension center philosophy of the program then operated by the University of Kentucky and committed the state to a comprehensive community college

program. A three-fold function of career-oriented technical programs, pre-baccalaureate education, and adult-continuing education was called for in the enabling legislation.

In July 1964, the University of Kentucky, guided by the leadership of its sixth president, Dr. John W. Oswald, provided for both the operation of a University System and a Community College System under the Board of Trustees. The Community College System operates as an autonomous system with the determination and administration of its academic programs being separate from that of the University System. The chief administrative officer of the Community College System is the Vice President for the Community College System, who is directly responsible to the President of the University.

Also, in 1964, new community colleges opened at Elizabethtown and Prestonsburg, bringing the total number of campuses under the new system to seven. Total enrollment that fall was 2,876 students; an increase of 67 percent over the previous year.

The Community College System continued its growth in all respects after 1964. After studies in 1965 and 1967 regarding the need for additional community colleges, recommendations concerning criteria to be used in establishing new community colleges were made to the University of Kentucky Board of Trustees. These criteria were adopted by the Board and submitted to the Council on Public Higher Education - the state's coordinating and planning body for public institutions of higher education. Acting on the Council's recommendation, the General Assembly amended the Community College Act to

recognize the Lexington Technical Institute, which had been operating on the University campus since August 30, 1965; and to authorize new community colleges at Louisville and Maysville in 1966, one at Hazard in 1967, and the last one at Madisonville in 1968. These latter four units were subsequently established and opened for students in 1968.

In July 1968, Paducah Junior College, a municipally-operated college founded in the 1930's, joined the Community College System as Paducah Community College. This brought to fifteen the number of units then operating under the University of Kentucky Board of Trustees.

In January 1970, the General Assembly of Kentucky, recognizing the need for additional higher education opportunities in the Northern Kentucky area, authorized the creation of a new four-year college, Northern Kentucky State College. The facilities of the Northern Community College, operated since 1948 by the University of Kentucky were, as of July 1, 1970, transferred to the administrative control of the newly-formed Northern Kentucky State College. This reduced to fourteen the number of units operating under the University of Kentucky Community College System.

Effective with the 1972 Fall Semester, the Fort Knox Community College was changed to a four-year residence instruction center and assigned to the administrative control of the University of Kentucky Vice President for Academic Affairs. Also in the Fall 1972, two sub-units began operation: one associated with Jefferson Community College

and the other with Hopkinsville Community College. The Southwest Campus of Jefferson Community College was opened in response to the request for more educational opportunities made by the citizens of the Southwest section of Jefferson County. The operation is temporarily housed in a high school operating in the evening hours and serving primarily part-time students. The second sub-unit is Eagle University, located at Ft. Campbell, Kentucky. Eagle University is a consortium of several institutions of higher learning including Hopkinsville Community College which offers educational programs on the military base at Ft. Campbell.

In 1968, the General Assembly authorized the establishment of two additional community colleges, at Glasgow and Carrollton; however, funds have not yet been appropriated for their activation.

SECTION I

ENROLLMENT

The number of students enrolled in the University of Kentucky Community College System during the 1976 Fall Semester is presented in Tables 1 through 3, and an enrollment history is presented in Tables 4 through 6.

The headcount credit enrollment of 17,196 students is shown in Table 1. This enrollment represented a slight numerical decrease of 166 from the 1975 Fall enrollment of 17,362. In comparison, the numerical increase in 1975 of 3,690 represented a percentage increase over the Fall of 1974 of 27%. Of the total enrollment, 13,417 were freshmen (78%) and 3,779 (22%) were sophomores. The ratio of freshmen to sophomores remained relatively unchanged from the previous four years and is typical of most community colleges, in that the retention rate of sophomores is generally low. Fifty-five percent of the freshmen and 61 percent of the sophomores were enrolled as full-time students. In 1975, 53 percent of the freshmen and 61 percent of the sophomores were full-time students.

The number of men and women enrolled is shown in Table 2. Of the students enrolled, 8,223 (48%) were men

and 8,973 (52%) were women. In the Fall of 1975, 52% were men and 48% were women. Fifty-six percent of the men were enrolled as full-time students, while 57 percent of the women were enrolled on a full-time basis. This was a slight increase for men from 1975 when 54 percent were enrolled full-time and a slight increase for women from 1975 when 55 percent were enrolled full-time. From 1971 to 1975, the percentage of full-time male and female enrollments had been declining even though the actual numbers had been increasing.

The number of students enrolled in the Community College System by place of residence is shown in Table 3. In 1976, only 245 were non-residents of Kentucky. This means that 98 percent of those students receiving credit instruction in the 1976 Fall Semester were Kentucky residents.

Enrollment History

Tables 4 through 6 present a history of enrollment in the University of Kentucky Community College System. Table 4 shows the headcount enrollment in 1964 when the System was established and for the 10-year period 1967-1976. Table 5 provides similar information about the full-time equivalent enrollment. Table 6 indicates the number of first-time freshmen enrollees since 1966.

Since 1964, credit enrollment has increased from 2,876 students in seven colleges to 17,196 students in

thirteen institutions. In twelve years, this has meant a numerical increase of 14,320 students and a percentage increase of 498. Over 90 percent of this growth has occurred in the eight colleges started after 1964 and the five remaining original colleges now account for only 27 percent (4,610 students) of the total enrollment as of Fall, 1976. Jefferson Community College now accounts for 34 percent of the total enrollment in the System.

Table 5 indicates the full-time equivalent credit enrollment for 1964 and 1967-1976. The full-time equivalent (FTE) computation is based on the total credit hours for which students are enrolled, divided by 15. Prior to 1973, however, the ratio was 16 to 1. The total FTE credit enrollment for the Fall of 1975 was 11,669. This is a slight numerical increase of 155 over the Fall of 1975 enrollment. Since 1964, the FTE credit enrollment of the Community College System, calculated on a 15:1 ratio, has increased from 2,084 to 11,669 reflecting a growth of 460 percent.

First-time freshmen enrollment, as seen in Table 6, accounted for 31 percent of the total enrollment and represented 39 percent of the freshmen enrollment of 13,417 for the Fall of 1976. Since 1966, the percentage of first-time freshmen in relation to the total enrollment has ranged from a low of 29.4 in 1973 to a high of 40.6 in 1968. The mean percentage for the period from 1966 to 1976 is 34.7 percent.

SECTION II

INSTRUCTIONAL PROGRAMS

The University of Kentucky Community College System is committed to the development of a comprehensive educational program with emphasis upon two-year technical and semi-professional programs which prepare for job entry. Information relating to the distribution of enrollment is provided in Tables 7 through 17. The number of graduates in these programs is detailed in Tables 18 through 20. Table 21 provides information pertaining to the library holdings which support the instructional programs. An analysis of the degrees held by the full-time teaching faculty is found in Table 22.

An analysis of the headcount enrollment by degree programs is shown in Tables 7 through 11. As shown in Table 7, 6,434 (37.4%) of the students are in transfer programs which will lead to a baccalaureate degree while 9,177 (53.4%) are enrolled in programs which lead to an Associate in Applied Science degree. The remaining 1,585 (9.2%) are mostly part-time students who have no degree objective. Of the students enrolled in the baccalaureate programs 54.0% (4,117) are full-time while in the

Associate in Applied Science programs 59.0% (5,411) of the enrollment is full-time.

Table 8 provides information on the change in enrollment between 1975 and 1976. There was a decrease in baccalaureate enrollment at all institutions except Elizabethtown, Hazard, Henderson, Prestonsburg, and Southeast. By comparison, in 1975 there was an increase in baccalaureate enrollment at all institutions except Ashland, Hazard, Henderson, and Southeast. All of the colleges except Hopkinsville, Lexington Technical Institute, Madisonville, and Prestonsburg experienced increases in Applied Science degree enrollment. Non-degree students increased at all colleges except Elizabethtown, Hopkinsville, Paducah, and Southeast. The percent of change in baccalaureate enrollment ranged from an increase of 42.6 percent at Hazard Community College to a decrease of 24.4 percent at the Southwest Campus of Jefferson Community College. The percent of change in Applied Science degree enrollment ranged from an increase of 29.5 percent at Elizabethtown Community College to a decrease of 72.6 percent at Eagle University. System-wide there was a decrease of 5.6 percent in baccalaureate enrollment and a modest increase of 2.4 percent in Applied Science degree enrollment. The percentage of students enrolled in Applied Science degree programs, 53.4% in 1976 and 58.5% in 1975, continues a trend which began in 1971 when enrollment in the baccalaureate degree programs accounted for 68 percent of the students.

A comparison of Tables 9 and 10 indicates that on a percentage basis, more men are enrolled in the baccalaureate programs than in Applied Science programs. Of the students pursuing a baccalaureate degree, 4,015 (62.4%) are men and 2,419 (37.6%) are women. Of the 9,177 student in the Applied Science programs, 3,583 (39.0%) are men and 5,594 (61.0%) are women. More women, 961 (60.6%) than men 634 (40.0%) were enrolled as non-degree students. (Table 11)

The credit hour production by degree level is shown in Table 12 and the comparable full-time equivalent enrollment is presented in Table 13. The FTE enrollment is computed by dividing the number of credit hours by 15. Of the 11,669 FTE students, 4,894 (41.9%) are in the baccalaureate programs while 6,288 (53.8%) are in Applied Science programs and 487 (4.2%) are non-degree. The difference between the percentage ratios of baccalaureate and Applied Science enrollment by headcount (Table 7) and full-time equivalent (Table 13) is partially explained by the greater number of part-time students in the Applied Science programs.

Tables 14 through 16 provide information on the enrollment by course level as differentiated from student degree level. As seen in Table 15, the full-time equivalent enrollment is 8,029 in baccalaureate level courses and 3,640 in Applied Science level courses. This is due primarily to the fact that approximately one-half of the course work in the Applied Science degree programs consists of general education courses which are reflected in the baccalaureate course enrollment.

Table 17 contains a summary of the headcount enrollment in continuing education activities and the number of continuing education units awarded by the community colleges during the 1975-76 year. Total enrollment in formal, short courses and organized programs was 14,869 students. Of this number, 5,230 (35.2%) were enrolled in programs for which individual continuing education units were awarded.

Analyses of graduates of the University of Kentucky Community College System are shown in Tables 18 through 20. Associate degrees are awarded to students who successfully complete with at least a "C" average one of the specified curricula, all of which require at least 60 semester hours. The Associate in Applied Science Degree is awarded to students successfully completing career-oriented programs. These programs are intended to lead to immediate technical or semi-professional employment. Table 18 indicates that of the 1,746 students who received an associate degree during the 1975-76 academic year, 710 (40.7%) were in the baccalaureate programs while 1,036 (59.3%) were in the Applied Science programs.

The program areas in which the Associate in Applied Science Degrees were awarded are shown in Table 19. There were graduates from thirty-seven of the Applied Science programs offered in the Community College System. Of the Applied Science degrees, 391 (37.7%) were in Nursing and 124 (12.0%) in Secretarial Science. The number of nursing graduates increased by 43 from 1974-75. In terms of the broad curriculum areas, the Allied Health area dominated

with 508 (49.0%) of the degrees.

A history of the number of degrees and certificates awarded in the University of Kentucky Community College System from 1972 through 1976 is presented in Table 20. The Community College System has discontinued the Certificate of College Studies. The Certificate was last awarded in 1974. Effective with the 1974-75 academic year the minimum number of credit hours required for the Associate in Arts and Associate in Science degrees was reduced from sixty-four to sixty.

Table 21 presents information relating to the number and type of library materials supporting the instructional programs. Increases in non-print units were reported by the colleges for 1975-76. A number of the colleges are developing sizable collections of microfilm and other microfilm and non-print units. A library to support the technical offerings of the Lexington Technical Institute is under development. In addition, the Lexington Technical Institute students have access to the University of Kentucky Lexington Campus libraries.

An indication of the educational level of the full-time teaching faculty is shown in Table 22(A). Of the 480 faculty members, the majority 356 (74%) have a Masters Degree while 39 (8%) have a Doctorate and 85 (18%) have a Bachelors or less.

In the academic year 1976-77, staff and faculty development in the University of Kentucky Community College System was supported by conferences, workshops and assistance grants

statewide and by similar in-service programs conducted by the individual colleges in the system. Additionally, participation by the faculty and staff in professional associations and meetings was encouraged and financially supported along with a limited number of sabbaticals and leaves of absence.

As Table 22(B) indicates, 82 in-service programs were conducted in 1976-77, with a total of 2,228 participants for all programs for the year. These figures are approximations in that the kinds of activities classified as in-service professional development programs varies among the colleges, and excludes the Clinic Process Experiment, mini-grants, summer teaching improvement fellowships, sabbaticals and leaves of absence.

Seven of the thirteen colleges were involved in a Kellogg Foundation program funded through the University of Massachusetts for a process to improve teaching skills of the faculty. Twenty-eight persons in the Community College System were involved in this experiment during the Spring term, 1977 [see Table 22(B)].

Also during the Spring term, fourteen "Mini-Grants" were awarded by the Community College System office providing monies for improvement of instructional materials, and eight faculty were funded by "Summer Teaching Improvement Fellowships" to make major course material revisions and improvements [Table 22(B)]. Six faculty were on a full-year sabbatical, one on a half-year sabbatical, and one faculty member was on a half-year leave of absence in 1976-77.

SECTION III

FINANCIAL SUPPORT

An analysis of information concerning the financial support of the University of Kentucky Community College System is presented in Tables 23 through 27. Nationally, community/junior colleges have three major sources of revenue - local tax support, student fees, and state support - for operational funds. The University of Kentucky Community College System, however, is almost completely supported by appropriations of the state legislature. While two of the colleges do have the benefit of local tax support, this income has been committed for site acquisition in the case of Ashland Community College and for program enrichment at Paducah Community College. Only at Paducah do the funds actually provide operational funds. The student fees of $195.00 per semester for a full-time state resident and $500.00 for a full-time non-state resident have been pledged to retire a twenty-one million dollar bond issue which is currently being used for construction projects throughout the System. Since these two sources of potential operating revenue are not provided for general educational purposes, the state appropriation becomes the major source of financial support for operating purposes.

The actual operating expenditures by major category for each community college for 1975-76 are shown in Table 23 and the percentage analysis by category is shown in Table 24. During 1975-76, $10,845,151 was expended in general educational funds for an FTE student enrollment of 11,514. This is an average expenditure of $941.91 per FTE student. The addition of auxiliary services and capitol outlay brought the total expended to $12,517,003 for 1975-76.

A percentage analysis of the expenditures for general education purposes is shown in Table 24. The percentage expenditure for instruction ranges from a low of 46.7% at Southeast to a high of 81.1% at the Lexington Technical Institute.

Information on the budgeted operating expenditures for 1976-77 is shown in Tables 25 and 26. For 1976-77, a total of $13,041,825 was budgeted for general educational operational support. It should be noted that neither the Commonwealth of Kentucky nor the University of Kentucky has a stated policy of a fixed dollar support per FTE student. Including the funds budgeted for capitol outlay and auxiliary services, the total budgeted expenditures for community college programs was $14,527,454 for 1976-77.

Two aspects of the Community College System general education expenditures are omitted from these tables: the first is the indirect administrative costs and fringe benefits for the Community College System within the University of Kentucky Lexington Campus budget. Certain administrative functions, in the business and fringe benefits area, are

handled for the System through the Lexington Campus. Cost estimates of this have been listed at $1,100,000 per year. In addition, debt service for the recent construction program for the community colleges is carried as a separate budget item. For 1975-76 the debt service was $1,430,065 and was budgeted at $1,430,440 for 1976-77. Taking these indirect costs into consideration would raise the average FTE expenditures to $1,211.32 for 1975-76.

Information concerning the average faculty salaries for each community college is shown in Table 27. The Community College System has only recently implemented a four level rank system and this is the third year individuals have appeared in all ranks. The average salaries do not include fringe benefits and are for a ten-month contract. Only teaching faculty are included in these figures which are prepared in accord with the national AAUP salary study. The figures in parenthesis indicate the number of faculty at that rank.

SECTION IV

STUDENT CHARACTERISTICS

An indication of the academic characteristics of first-time freshmen in the University of Kentucky Community College System is represented by the scores on the American College Test. The American College Test is required of all entering students who have no previous college work and are high school graduates, under 19 years of age. The ACT is a national achievement test which yields standard scores in the areas of English, mathematics, social sciences, natural science, and a composite score. It is used by all the public institutions of higher education in the state as a counseling and placement device. Students enrolled in technical degree programs or who are non-high school graduates over the age of 19 may take the ACT Career Planning Program instead of the American College Test. The ACT Career Planning Program is designed to help students relate their interests and abilities to educational and career planning.

The Mean ACT standard scores for each of the four tests and the composite score for all entering students in the Fall 1976 is shown by college in Table 28. A total of 3,147 students were included in the results. The mean composite ACT score varies from a high of 17.5 at Paducah Community College to a low of 13.8 at Jefferson Community College. The mean

composite of 15.7 for the System as a sholw is lower than the mean composite of 17.6 for the state of Kentucky. The differences between male and female students is shown in Tables 29 and 30. The mean composite score is higher for men than women. A comparison of the mean scores for community college students since 1967 can be seen in Table 31. The composite mean for the System of 15.7 is next to the lowest for the nine year period which was 15.6 in 1975, reflecting the national trend toward lower scores.

Information concerning the estimated family income is found in Table 32. Seven percent of the students in the System reported less than $3,000 annual income, while nine percent reported an annual income between $3,000 and $5,999. Thus, sixteen percent reported incomes of $6,000 or below.

The ethnic background of the students enrolled in the Community College System is found in Table 33. The overwhelming majority of the students are Caucasian, 13,503 (80.6%) with the next largest ethnic group being Afro-American, 2,300 (13.7%). Since 1971 the Afro-American enrollment has increased from 6.6 percent to 13.7 percent of the total.

The distribution of headcount students by age groups is shown in Table 34. The 5,908 (35.3%) students under 20 years of age comprise the largest category of students by age in the Community College System. However, there are 5,820 (34.8%) students age 26 or older. This further illustrates the atypical characteristics of community college students. There were 68 students age 65 or older, 40 of whom were enrolled at Hopkinsville Community College.
